

Resource: Math Fun with Shapes

Subject: Mathematics

Description:

This interactive worksheet introduces primary students to basic 2D shapes like circles, squares, triangles, and rectangles.

It includes shape identification, coloring activities, and simple real-world examples to help students recognize shapes in their environment.

Activities:

1. Match the shapes with their names.
2. Color the circles red, squares blue, and triangles green.
3. Identify the shapes found in your classroom.
4. Draw one object for each shape (e.g., clock for circle).

Learning Objectives:

- Recognize and name basic 2D shapes.
- Understand how shapes appear in real-world objects.
- Practice coloring and drawing to reinforce understanding.
